Story and context for current trend	
<p>The above shows a monthly trends chart for ASB within the Cardiff South West neighbourhood. This neighbourhood has seen an increase in overall ASB from 462 in the last quarter to 597 this quarter which shows an increase of 135 incidents or 29.2%. If compared to the same quarter last year where the total was 672 however, there has been a decrease of 75 incidents or 11.2%. Nevertheless further analysis suggests Riverside ward is currently undergoing an opposite trend, with an increase of 35 incidents or 29.9% when compared to the same quarter last year where the total was 117. South Wales Police, on behalf of the Community Safety sub-group, are currently undertaking a study of ASB reports in Riverside to establish possible links to alcohol consumption on football match days.</p>	<p>In 2015/16 there were 38 fixed penalty notices (FPNs) issued for littering in Cardiff South West; 7.9% of the total amount for Cardiff. This represents a rate of 6.9 per 10,000 population and is around half the Cardiff rate of 13.6. Over the same period there were 7 FPNS issued in the NPA for dog fouling; 24.1% of the Cardiff total. This equates to 1.3 per 10,000 population, above the figure for Cardiff (0.8). Waste management have reported no fly tipping prosecutions for this period. In May Cardiff South West partners arranged a litter pick in Plymouth Great Woods with plans to develop further litter picks that more closely involve community members.</p>

## Issue: JSA Claimant Rate (Pop. Aged 16-64) – NPAs, September 2010 – September 2015

Source: JSA Claimant Count, Nomis, ONS

### Story and context for current trend

Across the Neighbourhood Partnership areas, the JSA claimant rate in September 2015 ranged from just 1.6% in Cardiff North to 3.9% in Cardiff South West. The JSA claimant rate followed a similar pattern across each of the NPAs between September 2010 and September 2015, with the Cardiff South West area generally lagging behind. All of the NPAs have seen their rates decline over the period despite initial upward trends, with this reduction ranging from 1.1 percentage points in Cardiff North to 1.9 percentage points in City & Cardiff South. The difference between the highest and lowest NPA rates has also fallen from 2.8 percentage points in September 2010 to 2.3 percentage points in September 2015. The newly initiated Improving Youth Outcomes group will look to assist partners in reducing the number of Not in EETS within the Cardiff South West area.
